RIDER A - (Continued)

The "E" factor shall also provide for refund or recovery of amounts necessary to adjust for differences between actual over and under collections and estimated over and under collections included in the "E" factor of the previous PGC.

Interest shall be computed monthly at the appropriate rate as provided for in Section 1308(d) of the Public Utility Code from the month the over or under collection occurs to the effective month such over collection is refunded or such under collection is recouped.

Supplier refunds received applicable to PGC Rate Schedules will be included in the calculation of "E" with interest added at the annual rate of six percentum (6 percent) calculated in accordance with the foregoing procedure beginning with the months such refund is received by the Company.

For the purpose of computing monthly over and undercollections to be reflected in "E" the following will be deducted from Purchased Gas Cost:

1. Demand and reservation charges billed sales customers under Rate Schedule CSF and transportation customers with firm standby service under any applicable Delivery Service Rate Schedule. Such charges shall be based on the Company's cost of reserving firm pipeline services and redetermined annually during the course of the Company's 1307(f) filing to be effective during the ensuing PGC application period.
2. The commodity cost of gas applicable to contract sales and standby sales service as specified in Rate Schedules CSF, CSI, and applicable Delivery Service Rate Schedules.

"S" -- projected Mcf of gas to be billed under PGC Rate Schedules during the computation year.

"Purchased Gas" -- the volume of gas projected to be purchased by the Company and delivered to customers under PGC Rate Schedules, plus such portion of the company-used and unaccounted-for-gas as the Commission permits, including, but not limited to, natural gas, liquefied natural gas, synthetic gas, liquefied propane and naphtha.

"The Current PGC" -- is \$13.97 per Mcf, comprised of a C factor of \$11.99 and an E factor of \$1.98. (I)

"Computation Year" -- the projected year during which the PGC will be in effect.

The application of the purchased gas cost shall be subject to continuous review and to audit by the Commission at such intervals as the Commission shall determine. The Commission shall continuously review the reasonableness and lawfulness of the amounts of the charges produced by the purchased gas cost and the charges included herein.

(I) Indicates Increase.
